

Learning Path

Microsoft Dynamics 365 Microsoft Power Apps + Dynamics 365 Developer

To become a fully certified Dynamics 365 Microsoft Power Apps + Dynamics 365 Developer, a combination of two certification exams are required: **Microsoft Power Platform + Dynamics 365 Core (Exam MB-200)** and **Microsoft Power Apps + Dynamics 365 Developer (Exam MB-400)**.

If you are new to Microsoft Dynamics 365, we recommend you follow these steps:

- Go through the online self-study material listed in this document
- Register for instructor-led training to prepare for your certification exam

1. Fundamentals

Get started with Microsoft Dynamics 365 and Power Platform

The Fundamentals learning paths are recommended if you are new to Dynamics 365 and are worth completing even if you don't want to take the optional exams.

[Microsoft Dynamics 365 Fundamentals](#)

– On Microsoft Learn – *No registration required*

A starter learning path, with an optional exam, that will help you gain a deep understanding of the Dynamics 365 business applications and its target customers.

[Power Platform Fundamentals](#)

– On Microsoft Learn – *No registration required*

Power Platform is a widely used tool in Microsoft Dynamics 365 implementations. We recommend learning about it early on.

Prepare for your exam (optional)

Check your knowledge and make sure you are prepared with all the training resources and knowledge needed for the Dynamics Fundamentals and Power Platform exams.

– Downloadable document – *No registration required*

[Training for Microsoft Power Platform Fundamentals](#)

– Downloadable document – *No registration required*

Book your exam (optional)

Book your exam slot, either in a test center or as an online proctored exam:

[Microsoft Dynamics 365 Fundamentals \(Exam MB-901\),](#)

– On Microsoft Learn – *No registration required*

[Microsoft Power Platform Fundamentals \(Exam PL-900\)](#)

– On Microsoft Learn – *No registration required*

2. Associate Level - Core

Gain the skills for the Power Platform and Dynamics 365 Core exam

With the following modules you will get hands-on knowledge and learn how to work with Microsoft Power Platform + Dynamics 365 Core to complete Exam MB-300.

Learn how to work with Power Platform

[Create a canvas app in Power Apps](#)

– On Microsoft Learn – No registration required

Learn how to create and customize an app, and then manage and distribute it.

[Create a model-driven application in Power Apps](#)

– On Microsoft Learn – No registration required

This learning path introduces you to creating a model-driven app in Power Apps that uses Common Data Service.

[Automate a business process using Power Automate](#)

– On Microsoft Learn – No registration required

This learning path teaches you how to build workflows, and how to administer flows using Power Automate.

[Create and use analytics reports with Power BI](#)

– On Microsoft Learn – No registration required

Learn how to use Power BI and build business intelligence reports.

Learn how to work with Customer Engagement

[Implementing Dynamics 365 Customer Engagement Online](#)

– On Microsoft Learn – No registration required

Learn how to create, design and install Microsoft Dynamics 365 Customer Engagement.

[Get started with Dynamics 365 Portals](#)

– On Microsoft Learn – No registration required

An introduction to the Dynamics 365 Starter Portals and the fundamentals of portal administration, maintenance, and troubleshooting.

[Work with portals in Dynamics 365](#)

– On Microsoft Learn – No registration required

This learning path describes how portal components work within context of Dynamics 365 to deliver the content and Common Data Service for Apps data to external and internal audiences.

3. Associate Level - Specialization

Microsoft Power Apps + Dynamics 365 Developer

These are the learning paths recommended for the Microsoft Power Apps + Dynamics 365 Developer exam.

[Extending the Power Platform Common Data Service](#)

– On Microsoft Learn – *No registration required*

This learning path looks at the SDKs, the extensibility model, and event framework. It also covers when to use plug-ins, configuration of plug-ins as well as registering and deploying plug-ins.

[Extending the Power Platform user experience Model Driven apps](#)

– On Microsoft Learn – *No registration required*

Learn how to create client scripting, perform common actions and automate business process flow with client script.

[Introduction to developing with the Power Platform](#)

– On Microsoft Learn – *No registration required*

This learning path is the first step in learning about the platform, tools, and the ecosystem of the Power Platform.

[Extend Dynamics 365 portals](#)

– On Microsoft Learn – *No registration required*

This learning path describes how to transform a content portal into a full web app that interacts with Common Data Service. It explains how to secure data access based on the authenticated user role and relationship to the data. It also covers the options available to customizers and developers to extend the portal functionality and integrate with Microsoft 365 and Power platform components.

4. Certification

Prepare for your exam

Check your knowledge and make sure you are prepared with all the training resources and knowledge needed to become a fully certified Microsoft Power Apps + Dynamics 365 Developer.

[Training for Microsoft Power Apps + Dynamics 365 Developer](#)

– Downloadable document – *No registration required*

Book an instructor-led training course to gain the advanced knowledge you need, get hands-on lab practice and ask any questions you may have.

[Instructor-led virtual training course](#)

Book your exam

To become a fully certified Microsoft Power Apps + Dynamics 365 Developer you will need to complete two certification exams.

Once you're ready, follow the below links, log in to your Microsoft Learning account and book your exam slot, either in a test center or as an online proctored exam. The Microsoft Learning site will guide you through the process.

[Exam MB-200: Microsoft Power Platform + Dynamics 365 Core](#)
